Linh Le

Business Analyst | Data Storytelling | Creative Analytics

Houston, TX (Open to Remote) | k.linh.le2306@gmail.com | (206) 502-7469 | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Analyst with experience translating operational and production data into clear, actionable reporting. Background spans manufacturing operations, quality analysis, and systems integration. Skilled in SQL and Python-based analysis, stakeholder communication, and converting technical findings into insights non-technical audiences can use. Uses AI tools to work faster, and checks every output against the source data.

CORE STRENGTHS

Strengths: Data Storytelling & Reporting, Trend & Pattern Analysis, Content & Documentation Development, Stakeholder Translation (technical ↔ non-technical), Process Improvement, KPI & Dashboard Design

Technical: SQL, Python, Tableau, Excel/Reporting Automation, ERP Systems, Machine Learning (K-means, TensorFlow)

AI Tools: Claude, ChatGPT for SQL query writing, debugging, data cleaning, pseudocode brainstorming, summarizing, and documentation

PROFESSIONAL EXPERIENCE

SQL & Database Architecture Extern — Breaking Games (via Extern), Remote *10/2026 – Present*

- Building a SQLite analytics database from six raw e-commerce CSVs, mapping schemas and validating joins.
- Using Claude to draft and debug SQL queries on product sales, revenue, and ad spend, validating every result against the raw data.

Executive Assistant / Project Coordinator — ChenMega Machinery LLC, Houston, TX *03/2026 – 09/2026*

- Converted ERP production and inventory data into executive reports for sourcing, staffing, and scheduling.
- Served as primary liaison between manufacturing operations and vendors, clients, and leadership across a multilingual team.
- Built a shipment-tracking system and automated crate-labeling workflow, replacing manual processes across the warehouse.
- Identified recurring bottlenecks in procurement and documentation workflows and implemented process improvements.

Associate Systems Analyst — Expeditors, Seattle, WA *02/2025 – 07/2025*

- Gathered requirements from clients and internal stakeholders and translated them into technical EDI integration specifications.
- Configured and tested EDI transactions, using SQL to investigate data discrepancies and support solution design.
- Managed multiple concurrent EDI client implementations, coordinating timelines across business and engineering teams.

Quality Assurance Engineer Intern — InnovAsian Cuisine Enterprises, Seattle, WA *07/2024 – 12/2024*

- Analyzed production data to identify defect trends and outliers, reducing defect rates by 15%.
- Redesigned the Standard Operating Procedures documentation system, improving retrieval and operational efficiency.
- Validated product specifications through statistical analysis, contributing to a 10% increase in customer satisfaction ratings.

Project Manager, Capstone Client Project — SDI Engineering / Seattle University, Seattle, WA *09/2023 – 06/2024*

- Led a cross-functional team delivering a project management system for an external engineering client using Agile methodology.
- Built KPI dashboards to track project health and maintain stakeholder transparency.
- Delivered the project on budget with 100% milestone adherence.

PROJECT HIGHLIGHTS

Fixing Production Traceability at ChenMega — Case study

- Diagnosed a manual labeling process causing duplicate crate/serial numbers and inventory discrepancies; used Claude to brainstorm pseudocode and debug a rules-based Python generator that made duplicates structurally impossible.

Personalized Asthma Risk Prediction on Imbalanced Data — Published, IEEE ICCDA 2023 (Research Assistant, Seattle University)

- Designed a K-means clustering-based algorithm to address class imbalance, improving model precision by 25%; presented findings to non-technical audiences across five workshops.

EDUCATION

M.S. in Business Analytics — Seattle University (Expected 2027)

B.S. in Computer Science (Mathematics Specialization), Minor in Data Science — Seattle University
